"Mrs. Jameson has probably done more than any other writer to familiarize the public mind with the principles of art; and her perception of the inner spirit of a great work was so thorough, that its mere statement was eloquence. Her style has a richness, energy and vivideness corresponding to the clearners and failness of her intellect and the earnestness and waventh of her heart. She could write nothing which was not readable; and the books in which she discusses social and moral questions are not only among the most valueble, but among the most popular books in the literature of philanthropy and reform."—Boston Transcript.

THIRD THOUSAND JUST READY.

From The Boston Transcript.

"Nobody can read it without feeling the force of its pathos, its tenderness, its homely sagacity, its practical truth. It exhibits the career of two brothers, one of whom is the representative of selid character, and the other of impulsive feeling and brilliant slent; and the mode by which the separate incidents of their lives are made to harmonize in one plot, shows no little artistic power. Among the throng of novels which press upon the attention of the novel reader, this one is worthy of especial notice."

AGAINST WIND AND TIDE.

AGAINST WIND AND TIDE.

From The Boston Fost.

"Our readers will be pleased with this novel—it is above the usual standard of works of fiction, and it is one that we can considently recommend; the author has written several other popular stories, which have gained a strong hold upon those who have read them, and, according to competent judges, this will be found to be even more interesting, and superior to them all.

" " " " I confess that no English novel smore Adam Bede, has so absorbed me in the reading, and, when I add that, in many respects, this book is a striking reminder of " John Halifax," I feel that the comparison is equally complimentary and just."

AGAINST WIND AND TIDE.

From The Philadelphia Bulletin.

From The Philadelphia Bulletin.

The author of 'Sylvan Holt's Daughter' has many admirers, and their number will be greatly increased by the new and admirable nevel now before us. 'Holme Lee' is, of course, an assumed name, designed to confine the world as to the gender of the author, just as 'Currer Bell' was chosen by Charlotte Bronte. We have little doubt that 'Holme Lee' is a woman, and we consider her story, 'Against Wind and Tide,' a feather in the cap of the sex.

" " We can safely assert that for power in describing character, insight into the workings of the heart, and true knowledge of the world, there has been no book cequal to this published rince 'Adam Bede.' The plot of the story is irregular, and perhaps insatistic; but it is none the less an absorbing story, full of pathos, power and truth to nature."

From The Providence, R. I. Journal.

"An earnest, hearty novel, full of interest from its opening chapter to its last page. The author is a keen observer of lift and character, and shows in the natural development of his story, a freshness of feeling, a strength of thought, a faculty expression, and a sympathy with the struggles of the humi heart, which are rare and remarkable in this day of commo

to the British Board of Admirally, forming a connected and continuous history of Arctic Exploration during the present century.

This book is the only narrative of Arctic Explorations taken from Sir John Franklin's private papers, and is invaluable to every library, family, or individual in the land.

Handsomely bound in one large Himo. volume of 420 pages, with beautiful frontispiece in oil colors. Price \$1.25.

There is something so inexpressibly touching in the contemplation of the sad fate of Sir John Franklin that it would appear to be only necessary to call attention to this work to give it a place on every book-shelf in the country. To say that it deserves to be read by every one, young or oid, throughout the land is but faint praise; that every one would be the better for reading it, is surely not saying too much. It has a pecudiar value and interest as being the only narrative compiled from Franklin's private papers. His territies hardships and sufferings are told in his own words. We see in every page that indominable perseverance and unifring energy which no amount of suffering could break, or turn from the object to which he devoted his life, and for which he sacrificed it—the advancement of science, and the benefit of mankind. A just tribute is paid to the noble and devoted Lady Franklin, in a full account of the United States on receipt of \$1.25. Orders from the trade solicited.
